UDL Unit Planning for: Plant Growth and Changes (Grade 4 Science)

Teach this unit during fall or spring!!!

Learner Profiles:

<table>
<thead>
<tr>
<th>Student Names</th>

</tr>
</thead>
<tbody>
<tr>
<td>1-18</td>
<td>Average (at grade level)</td>
<td>- Visual instructions (diagrams, games, videos, websites, dual language books)</td>
</tr>
<tr>
<td>19</td>
<td>Gifted</td>
<td>- Group and individual assignments</td>
</tr>
<tr>
<td>20</td>
<td>English Language Learner (ELL) from Columbia</td>
<td>- Hands-on activities</td>
</tr>
<tr>
<td>21-22</td>
<td>Speech Impediment and Reading Disorder</td>
<td>- One-on-one supports</td>
</tr>
<tr>
<td>23</td>
<td>Attention Deficit Hyperactive Disorder (ADHD)</td>
<td>- Presentations applying oral, written and technological skills</td>
</tr>
</tbody>
</table>

Management:

Issues may arise during this unit plan due to students’ concentration, patience and ability to understand. Know the content very well in order to be prepared to improvise and change lessons on the spot.

Safety:

The activities conducted during this unit plan may represent a risk for some students. A field study, using a knife and glassware will take place during this unit. These concerns must be addressed with students by giving them a proper oral and written instructions. There may be a need for a safety lesson. Parents will receive a letter stating the unit procedures and risks.

Essential Questions:

Big Idea: Plant Life Cycle

Over-Arching Question: How plants help humans stay alive (oxygen and food source)? (By answering this question students will understand the importance of learning about plants and their growth/changes.)

The over-arching questions, as a rationale, will trigger students to question and examine this topic further. This is a perfect set up for discussions to occur where the coupled inquiry process will allow observation, examination, and analysis to take over this unit. This unit is designed for specific group of students however, changes will occur. Throughout the learning activities students are expected to drive the unit as their learning process develops. Some of the questions that may arise are: How can a cactus live without water? Why do some trees lose their leaves while others don’t? Why is the grass green?

Real-World Application: Growing plants in the classroom (example: Beans)

The real-world application will allow students to be critical as they apply problem-solving skills in order to achieve general and specific outcomes. These outcomes are specifically outline below.

Desired Outcomes:
**General Learning Expectations (GLE):** Students will be able to demonstrate their knowledge, interpretation, propagation and enhancement of plant growth by growing, analyzing and questioning plants life cycle.

**Specific Learning Expectations (SLE) for Science:** Students will:
- Describe the importance of plants to humans and the environment.
- Identify the general purpose of plants roots, stems, leaves and flowers.
- Describe common and special need plants.
- Explain the plant requirements for growth.
- Nurture a plant through one complete life cycle.
- Recognize plants that have common life cycle and produce new plants that are similar.
- Describe the care and growth of a plant.
- Describe different ways that seeds are distributed.
- Develop skills such as investigation of natural things and purposeful action leading to inferences and observations.
- Develop attitudes such as creating a positive and responsible environment.

<tbody>
<tr>
<td><strong>Diagnostic Assessment:</strong> Questioning student’s prior knowledge and misconceptions.</td>
<td><strong>Continuous Assessment:</strong> Student’s progress throughout the unit.</td>
<td><strong>Final Assessment:</strong> Plant Scavenge Hunt</td>
</tr>
<tr>
<td>As the unit is introduced find out: What do you know about plants? What would you like to learn about plants? Have students engage in an activity (example: Ask students to draw a picture or use describing words to show a tree, the</td>
<td>Students will be completing mini projects, such as bean germination and 3D plant life cycle, to represent their current understanding and progress. These projects will demonstrate any changes that need to be made and addressed. Besides the projects observing and analyzing students development will be the focus of every lesson.</td>
<td>Students GLEs and SLEs will be tested as they are involved in a scavenge hunt. In order to succeed in this exercise you need to know objectives and topics that have been addressed during this unit. Students will keep their own score as they are engaged in this activity. They will not only be developing active skills but also self-assessment skills.</td>

## Resources and Materials:

- Science Glossaries and Journals
- Graphs/Diagrams
- Word Wall
- Videos and Games
- Review Sheets

### Resources

- Books:
  - Curious George Plants a Seed (Spanish and English)
  - Paco and the Giant Chili Plant (Spanish and English)
  - From Seed to Pumpkin
  - How Apples Grow
  - Fun With Nature
  - Look What I Did With a Leaf

### Websites:

http://www.youtube.com/watch?v=06H27-OaC44&feature=related

Activity: Seasons and Plants

Materials: personal journals, computer with internet (make sure students have access)

Subject Outcomes: Science, Language Arts and Social Studies

Lesson 2 (one period): Planting Beans - Germination
(inquiry by questioning and experimenting, differentiation for ELLs, reading disorder and gifted students)

Sources:
Video 1:  
http://www.teachersdomain.org/resource/tdc02.sci.life.stru.germinator/

Activity: Planting Beans (nurture daily)

Materials: personal journals, beans, ruler, paper towel, water, plastic bag, tape and computer with internet

Subject Outcomes: Science, Language Arts and Social Studies

Lesson 3 (one periods): What Plants Have
(inquiry by questioning and experimenting, differentiation

complete the activity by researching online and book resources and presenting them to the rest of the class
different ways that seeds are distributed.

9. Develop skills such as investigation of natural things and purposeful action leading to inferences and observations.

10. Develop attitudes such as creating a positive and responsible environment.

Materials: personal journals, computer with internet (make sure students have access)

**Subject Outcomes:** Science and Social Studies
### Mathematics

Students will:
1. Solve problems
2. Understand 3D objects and 2D shapes

### Physical Education

Students will:
1. Develop active lifestyle
2. Participate in an activity

### Subject Outcomes: Science and Language Arts

**Lesson 5** (one period): How Plants Grow
(inquiry by questioning and experimenting)

Sources:
Diagram:
Photosynthesis (some students may require a diagram to be provided while, others may want to use the computer instead of a journal)
Video: (2)
http://www.youtube.com/watch?v=2fmrgsp9oEA&feature=related

Materials: personal journals, computer with internet (make sure students have access), pot, soil and water

### Subject Outcomes: Science and Mathematics

**Lessons 6** (three periods): Creating A 3D Plant Life Cycle (Project)
Will take up two periods to make the project and one period to present
(inquiry by questioning and experimenting, differentiation for ELLs, reading disorder and gifted students)

Activity: Creating Germination Model

Materials: personal journals, cardboard, real beans seeds, various textured materials, glue and tape

**Lessons 7/8** (two periods): Why Are Plants Important
(inquiry by questioning and experimenting)

8: Important To Humans
<table>
<thead>
<tr>
<th>Activity: Grinding Grain (Important to humans)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Materials: personal journals, grains (wheat, rice), clean cloth, rolling pen and sieve</td>
</tr>
<tr>
<td>9: Important To The Environment</td>
</tr>
<tr>
<td>Activity: Water traveling up the stem (Important to the environment)</td>
</tr>
<tr>
<td>Materials: personal journals knife, spoon, clear glass, food coloring, celery stalk</td>
</tr>
<tr>
<td>Subject Outcomes: Science, Language Arts and Social Studies</td>
</tr>
</tbody>
</table>

**Lesson 9** (two periods): Review  
(inquiry by questioning and experimenting, differentiation for ELLs, reading disorder and gifted students)

Brainstorming ideas and concepts addressed during this unit

Sources:
Video: (4)
http://www.youtube.com/watch?v=MOKB6B6ROZE

Materials: personal journals and computer with internet  
(make sure students have access)

Subject Outcomes: Science, Language Arts and Social Studies

**Lesson 10** (one period): Assessment  
(inquiry by questioning and experimenting, differentiation for ELLs, reading disorder and gifted students)
Activity: Plant Scavenge Hunt (vocabulary and concept assessment)

Materials: school playground and questions

Subject Outcomes: Science, Language Arts, Social Studies, Mathematics and Physical Education

Lesson 11 (whole morning or three periods): Field Study - Devonian Garden (inquiry by questioning and experimenting, differentiation for ELLs, reading disorder and gifted students)

Activity: A session with an expert

Subject Outcomes: Science, Language Arts, Social Studies, Mathematics and Physical Education

Reflections: Reflect on what worked well and why, and what you could have done differently. Identifying successful and less successful lessons.
